

You're invited to further your dental implant knowledge by attending the Modern Implant Institute Study Club.

Come and participate in the Modern Implant Institute Study Club. You will be introduced to cases and topics that will improve your dental implant knowledge. These presentations will alternate between prosthetic and surgical topics, and will address issues and concepts that clinicians face daily.

The MII Study Club meets every other month, on even months. These meetings will eventually take place in an in person setting, but will continue with an online format, until further notice. Participants are encourage to bring a case they would like to have reviewed and discussed by the speaker and other participants. Instructions to have your case reviewed can be found on our website, under the "Study Club" tab. Reserve your spot today, as participation size is limited.

Tissue Level Implants
Wednesday, June 23, 6-9 pm, 3 CE
Zoom Webinar—Registration Required
Presented by Joseph Kim, DDS, JD

Over the past several years, aggressively platform switched implants have proliferated in the market, with various claims, including bone maintenance and unified prosthetics. As these designs gain popularity, it often comes at the expense of older prosthetic platforms. One of these is the tissue level implant, which has been promoted as a one stage surgical solution. Due to its unique design, tissue level implants are also useful in certain challenging cases, including areas with uneven bone levels and thin gingiva. Join us to see how tissue level implants can fit into your implant armamentarium.
