

You're invited to further your dental implant knowledge by attending the Modern Implant Institute Study Club.

Come and participate in the Modern Implant Institute Study Club. You will be introduced to cases and topics that will improve your dental implant knowledge. These presentations will alternate between prosthetic and surgical topics, and will address issues and concepts that clinicians face daily.

The MII Study Club meets every other month, on even months. These meetings will eventually take place in an in person setting, but will continue with an online format, until further notice. Participants are encouraged to bring a case they would like to have reviewed and discussed by the speaker and other participants. Instructions to have your case reviewed can be found on our website, under the "Study Club" tab. Reserve your spot today, as participation size is limited.

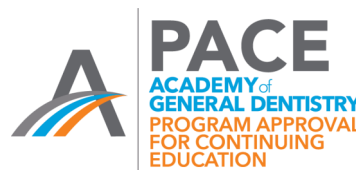

**Predictable Implant Prosthetics**  
*Wednesday, December 15, 6-9 pm, 3 CE*  
*Online Webinar—Registration Required*  
*Presented by Joseph Kim, DDS, JD*

Every dentist strives to provide long lasting, precise restorations for their patients. This is especially true in the realm of implant prosthetics. Implants provide restorative options for our patients that may have been impossible on natural dentition. The number of options, however, can be overwhelming, and clinicians often find themselves scratching their heads, not sure where to begin. Even after the maze of options is navigated, and successful prosthetic rehabilitation has been achieved, it becomes quickly evident that implants are not teeth, and new problems can emerge. Join us for another practical study club topic. Remember to submit your own cases for potential review.
